

Op Session April 20 2019

Bob #1 April 29, 2019, 11:27pm

Here is a very “rough cut” video edit of a few shots I captured during the last op session prior to Rocky Op 2019.

[Link to short video on Smugmug.](#)

The “chug” sound you hear at the rotary is not the SW1200 switcher, but an Alco RS32 switching the “Doughnut Run” in the background. The SW has no sound decoder, not yet.

Cool shots Bob! I put up an END CTC / BEGIN CTC sign in Mount Union; maybe that’ll help the “spatcher” and head end crews to clear the CTC plant at the south end of the siding. We might need to move the sign as we find the sweet spot. Rocky Ops should be fun!
